### Song Story.

Inspired – not surprisingly!!! – while watching a Saturday morning nature program designed for older children. It was really interesting! I already knew about zebras and snowflakes of course, but had never heard OF Spectacle Bears... and you cannot HELP but laugh at the thought of the scientists first even THINKING of smearing ink on a bear's nose to get a picture of all the whirls of lines on it. How amazed they must have been to realize that nose prints are just as unique to bears as fingerprints are to us humans. Who but a wonderfully CREATIVE God would dream of such a fun & amazing design?
