Song Story. I really had to struggle to write out the music for this song. The chords don't fit normal music theory.... I had just sat at the computer controller and started playing this song. So I literally had to study the printed score to figure out what chords I was playing in order to record them for other musicians who may want to rejoice with God using this song. The usual phrase is for people to say "I have no idea where this idea came from." But of course, we know God the Creator answers prayers for inspiration... and sometimes with weird songs like this! The ***QUESTIONS*** vocal lines were written in minutes, as were the melody and chords. Jazz style is beyond my natural skills... timing has always been my weakness, and God really had to help me write the music sheet for this shuffle song. But the words for the ***ANSWER*** vocal lines took quite a lot of prayers for wisdom (James 1:5) and Bible research.... Jesus said so many wonderful Words from God that it was hard to keep this song at only 4 verses!!
